Hands on experience with the preparation and cultivation of primary neuronal cells and live cell fluorescence imaging is a prerequisite for this position. In addition, candidate must demonstrate extensive experience with methods of molecular and cellular neuroscience, cellular pharmacology, biochemistry and keen interest in quantitative approaches.

Molecular Neuropharmacology: Strategies and Methods: Arne ...

In *Molecular Neuropharmacology: Strategies and Methods*, leading neuroscience investigators combine advanced chemistry with molecular modeling to produce a powerful collection of cutting-edge techniques for characterizing the ligand or substrate binding of neurotransmitter receptors and transporters.

Molecular Neuropharmacology eBook by - 9781592596720 ...

Neuropharmacology is the study of how drugs affect cellular function in the nervous system, and the neural mechanisms through which they influence behavior. There are two main branches of neuropharmacology: behavioral and molecular. Behavioral neuropharmacology focuses on the study of how drugs affect human behavior (neuropsychopharmacology), including the study of how drug dependence and ...
