Regarding the laws of physics, relative gravity should be able to explain how the galaxies are moving. Relative gravity involves the force of gravitational energy as a universal law. As Alok Jha states, "It encapsulates the idea that all the particles of matter in the universe attract each other through the force of gravity" (Jha, 2013).

In this video, we look at gravity and weight. We explore the difference between mass and weight and learn how to calculate weight. We then explore how the weight of an object depends on its location.

All truth passes through three stages. First, it is ridiculed. Second, it is violently opposed. Third, it is accepted as being self-evident: Arthur Schopenhauer -- In questions of science the authority of a thousand is not worth the humble reasoning of a single individual: Galileo Galilei -- Science is a wonderful thing if one does not have to earn one's living at it: Albert Einstein -- When ...
