Protistology

Protistology is a scientific discipline devoted to the study of protists, a highly diverse group of eukaryotic organisms. Its field of study overlaps with more traditional disciplines of phycology, mycology, and protozoology, just as protists, which, being a paraphyletic group embrace algae, some organisms regarded previously as primitive fungi, and protozoa ("animal" motile protists lacking ...

Protistology - Wikipedia

The Journal of Eukaryotic Microbiology contains work on all aspects of protists, including lower algae and fungi.

The European Congress of Protistology (ECOP).

A protist (/ ' p r oʊ t i s t /) is any eukaryotic organism (that is, an organism whose cells contains a cell nucleus) that is not an animal, plant, or fungus. While it is likely that protists share a common ancestor (the last eukaryotic common ancestor), the exclusion of other eukaryotes means that protists do not form a natural group, or clade. So some protists may be more closely related ...
