Personally I think Griffiths is the clearest writer, and the best quantum book to start with. After that I think reading Shankar will help fill in some of the formalism that Griffiths leaves out; Griffiths really boils down the concepts, sometimes too much, so reading Shankar can give a different, clarifying perspective.

Solutions for R. Shankar: Principles of Quantum Mechanics I got this book in my 3rd year of uni when a certain QM course was destroying my life. It seems to strike a good middle ground between being too mathematically simplified (Griffiths) and incomprehensible for beginners (pretty much every other text I tried to read back then).
