Roto-Sieve - CleanTek: Rotary Drum Screen, Fine, MBR ...

Lackeby Products develops and manufactures high quality products for mechanical particle separation. Our range of drum screens, classifiers and decanters are state-of-the-art and designed to reliably mechanically separate particles from liquids. ... Roto-Sieve ® Drum Screens.

Lackeby Roto-Sieve Rotary Screen - The Concept

Function Roto-Sieve drum screens consist of a perforated drum (1) with internally fixed screw (2), which transports the separated particles out of the drum. The drum rotates by drive belts (3) and is driven by a cog gear motor (4). Incoming liquid is fed into the drum through an inlet pipe (5), which distributes the water over a large area of the drum's interior.

Lackeby roto sieve drum screen - online-tandem.de

The Roto-Sieve is a rotary drum screen available in 5 models, ranging from the smallest RS-11, with a capacity of 140 gpm, to the largest RS-416 which can process nearly 7000 gpm. With the exception of the RS-11 and its permanently lubricated trunnion wheels, each model features a drive system without trunnion wheels for significantly lower maintenance requirements and better reliability.
