Read Book Sanyo Dp42746 Troubleshooting

I have a 1 year 9 month old Sanyo DP42746 42" plasma TV. It has been working fine till the other day, the screen went black and then the sound went silent. Now the only thing that happens is the little power light comes on when you press the power button or turn it on via remote, sometimes you'll get a crackle from the speakers when you turn it on.
