Putting another way, financial statement analysis is a study about accounting ratios among various
items included in the balance sheet. These ratios include asset utilization ratios, profitability ratios,
leverage ratios, liquidity ratios, and valuation ratios.

Chapter 2 Financial Statement and Ratio Analysis

The Statement of Cash Flows. An accounting professor of mine referred to the statement of cash
flows as the “desert island” financial statement because if he were stranded on a desert island and
could have only one financial statement with which to analyze a company, he would want it to be
the statement of cash flows.
