Phase Diagram Worksheet Name: _____ A phase diagram is a graphical way to depict the effects of pressure and temperature on the phase of a substance: The CURVES indicate the conditions of temperature and pressure under which "equilibrium" between different phases of a substance can exist. BOTH phases exist on these lines:

Teaching Transparency Worksheets Chemistry: Matter and Change • Chapter 4 89 1. What kind of particles do the arrows represent? What is the charge of the particles? 2. Which diagram depicts the plum pudding model of an atom? 3. Which diagram depicts Rutherford's actual results from his gold foil experiment? How

TEACHING TRANSPARENCY WORKSHEET 19 The s-, p-, d-, and Use ...

2. Which diagram best represents the group and period trends in atomic radii in the periodic table? Generally increase Generally increase Generally decrease Generally decrease 3. The general trend in the radius of an atom moving down a group is partially accounted for by the a. decrease in the mass of the nucleus. b. fewer number of filled ...

Phase Diagram Worksheet #2 - currituck.k12.nc.us

TEACHING TRANSPARENCY WORKSHEET Atomic Orbitals 1. What is the shape of an s orbital? Class 16 Use with Chapter 5, Section 5.2 2. What is the relationship between the size of an s orbital and the principal energy level in which it is found? 3. What is the shape of a p orbital? How many p orbitals are there in a ublevel? 4.

Solved: Phase Diagram Worksheet 1. Label The Following On ...

The phase diagrams for a pure solvent and the solvent in a solution are shown. Identify the normal freezing (fp_solv) and boiling (bp_solv) points for the pure solvent and the normal freezing (fp_soln) and boiling (bp_soln) points of the solution at 1 atm. Assume the solute is nonvolatile and that the solid that freezes from solution is pure solvent.

3) What is the normal

About This Quiz & Worksheet. See what you know about phase diagrams and what they're used for. The practice questions on the quiz will test your understanding of the diagrams themselves, what one ...

CHAPTER 12 Answer Keys Teaching Transparency 32 - Global Wind Systems 1. the northeast trade winds in the northern hemisphere and the southeast trade winds in the southern hemisphere 2. Air rises at the equator and then flows northward. At about 30 degrees north latitude, the air sinks.

bryant.dearbornschools.org

Phase diagrams contain discrete regions corresponding to the solid, liquid, and gas phases. The solid and liquid regions are separated by the melting curve of the substance, and the liquid and gas regions are separated by its vapor pressure curve, which ends at the critical point. Within a given region, only a single phase is stable, but along ...
