Start eating healthy today with literally one change: Try a new vegetable. Cut one soda out of your day. Prioritize protein in your next meal. Swap out one high calorie drink for a zero calorie drink. I don't care what the change is, just as long as you make one! Okay enough about me, let's talk about you:

*Healthy Eating for a Healthy Weight | Healthy Weight | CDC*

Calories are a measurement, like an inch or a tablespoon. They note how much energy is released when your body breaks down food. The more calories a food has, the more energy it can provide to the body. When you eat more calories than you need, your body stores the extra calories as fat.

limitations, staying unrealistically thin, or depriving yourself of the foods you love. Rather, it's about feeling great, having more energy, improving your health, and boosting your mood. Healthy eating doesn't have to be overly complicated.

### *The Guide to Healthy Eating by David Brownstein*

The key to a healthy diet is to eat the right amount of calories for how active you are so you balance the energy you consume with the energy you use. If you eat or drink more than your body needs, you'll put on weight because the energy you do not use is stored as fat. If you eat and drink too little, you'll lose weight.

### *Healthy Eating - HelpGuide.org*

Points to tomatoes, carrots, and carrot juice: For carrots and tomatoes, a little processing is a good thing. These veggies pack the greatest antioxidant punch in the form of juices, sauces, and purees. Points to cauliflower, broccoli, and brussels sprouts: Kids
