Recent court decisions have caused many to question whether software and computer implemented business methods are still patentable under U.S. law. In particular, the October 30, 2008 In re Bilski decision of the Federal Circuit caused many commentators to suggest that the age of software patents is over.

## **Bilski: Are Software Patents Still Valid (BitLaw)**

Bilski v. Kappos, 561 U.S. 593, was a case decided by the Supreme Court of the United States holding that the machine-or-transformation test is not the sole test for determining the patent eligibility of a process, but rather "a useful and important clue, an investigative tool, for determining whether some claimed inventions are processes under § 101." In so doing, the Supreme Court affirmed the rejection of an application for a patent on a method of hedging losses in one segment of the ...
