Behavioral Child Development Theories. Behavioral theories of child development focus on how environmental interaction influences behavior and are based on the theories of theorists such as John B. Watson, Ivan Pavlov, and B. F. Skinner. These theories deal only with observable behaviors. Development is considered a reaction to rewards, punishments, stimuli and reinforcement.

Economics of Development: Concepts and Approaches Economics of development refers to the problems of economic development of underdeveloped countries. In the early days, the focus was on problems that were statistic in nature and largely related to a Western European framework of social and cultural institutions.
