Machinists and Tool and Die Makers : Occupational Outlook ...

5.2.2 Die Block The design of die block depends upon workpiece size and thickness. The type of die and contour of workpiece also play an important role while designing of the die block. The selection of size of die block also depends upon experience. The die blocks are made from a solid block of tool steel for small workpieces.

Metal stamping dies, progressive dies, tool and die ...

functions. We explore the common types of die construction, compare stripper design options, and analyze common die operations. Punch Press Perforation is generally the most severe operation performed in a die. That's because the punch press applies forces ranging from a few tons to more than 1000 tons. Proper press alignment is essential.

Manufacturing Tooling Introduction

Tool and die makers are responsible for designing and building molds, dies, and fixtures that allow thousands of products to be made every single day. They are expected to have knowledge of any machine in the shop and must be able to turn a concept (such as a precise drawing or a napkin sketch) into reality.
