The impact of time of day on your photography varies according to how light or murky the atmosphere above is. Black and white photography One of the few things that actually sunk in from college professor during a B&W film photography course (g.o.y. 1995!) is that cloudy days provide excellent opportunities for black and white photos.

When it's cloudy, the color of light tends to be bluer. If you're shooting someone on a cloudy day and choose a white balance that is more yellow, then the final image is going to look unnatural. When shooting on overcast days, I like to shoot my images with a Kelvin temperature of around 4000 - 4500.

The premise of "Why Photographers Prefer Cloudy Days" by Haje Jan Kamps is that cliches can be good and can even be beneficial. The author argues that cliches are cliches for a reason--they represent a known truth. The author then proceeds to share some "cliches" for better photography. Hence the title as shooting in cloudy days indeed a cliché.
