For the first year of its release, the Pajero was only available as a 3-door, short-wheelbase model. Three engines were available, though, the 3.0-liter V6 was the most popular. Other options that made it unique for a vehicle of its type included a turbo diesel engine. Power steering and a front double-wishbone suspension.

Solution GDI 4G93 engine idle issues

Gasoline direct injection (GDI), also known as petrol direct injection, is a mixture formation system for internal combustion engines that run on gasoline (petrol), where fuel is injected into the combustion chamber. This is distinct from manifold fuel injection systems, which inject fuel into the intake manifold. The use of GDI can help increase engine efficiency and specific power output as ...
